TESTIMONIAL

Smiths Detection (Asia Pacific) Pte Ltd is a technical engineering company and has its regional Headquarters located in Singapore. With the expiry of our lease Smiths approached Corporate Locations (recommended through a word of mouth) to find a new location of a specific size, vicinity and budget for the sales, finance and commercial functions of the business.

Smiths found all dealings with Douglas and the Corporate Locations team to be extremely professional and it was obvious that the Corporate Locations team understood the commercial space market extremely well.

This gave us the confidence to stay with the one company. With the tight market conditions Smiths was able to understand what was available to meet our specific needs quickly and was then shown numerous properties from which to make our decision. We had some shifting goal posts of our own which added to the complexity of the task but at each and every turn Corporate Locations was able to rise to the challenge and ensure we were fully aware of all our options which eventually lead to the acceptance of our current space in Shaw Tower.

From first contact until the space was secured Corporate Locations were professional, accommodating, and knew their job. This made the process of relocating as pain free as possible. I would thoroughly recommend Douglas and his team for any size business relocation.

Yours sincerely,

Cameron Mann
Vice President & General Manager Asia Pacific
